

I am Cecilia Arminio, I am studying Clinical Applications of Psychology MSc and I am running as a Penrhyn Road Campus Representative.

Campus Representatives are the base to improve the campus and, in this way, enhance our welfare, after all, as students, it is where we spend the vast majority of our time!

I already have been part of a student group during my undergraduate, so I am trained to express my ideas in meetings and have them heard.

I am determined, positive, friendly and being politically part of what I do is something in which I am good at and keeps me focus on the social/environmental issues and how to solve them.

My main goals are basic but essentials:

- I am going to try to keep our library open, even if the Covid19 situation gets worse;
- The same with all the Penrhyn Road buildings;
- I am going to hear your concerns about the campus and find a solution for the main issues you are experimenting; my voice is your voice!
- As a student of psychology, I will support every idea which will improve your wellbeing;
- I am also an environmental activist and I will continue to support and to improve the ongoing policies to make Kingston an always greener place.

My university is your university, let's make it better together!
